EXPERIENCE

Lead UI Engineer

Symmetry Systems

San Francisco, USA

Oct 2023–Present

- Managed the UI team for DataGuard, a data posture security management product, balancing workloads, prioritizing tasks, and creating and tracking tickets to ensure everything stays organized. Oversaw the weekly release of the latest UI version to customers, including Lowe's, Mattel, and even NASA.
- Collaborated closely with the UX and backend teams to create a user-friendly interface for new features, and tracked feedback to continually improve usability.
- Implemented multiple features from scratch, including role-based authentication.

UI Engineer

Symmetry Systems

San Francisco, USA

Jun 2022–Oct 2023

- Collaborated with the UX team to develop user-friendly features for DataGuard using React.js. Maintained the GraphQL server by updating the schema and writing resolvers to connect frontend and backend APIs.
- Fixed bugs based on feedback from customers and the customer success team, and managed feature rollouts for DataGuard using LaunchDarkly.

Frontend Engineer

Periodic SL

Tenerife, Spain

Apr 2022–Jun 2022

- In the early stages of one of the company products, Sugar, a dating app, I implemented features and fixed bugs based on guidance from the team manager.
- Using Next.js, I turned Figma designs from the design team into functional user interfaces, managing my tasks to deliver quality results on time.

Fullstack Engineer

Netpossible LLC

Córdoba, Argentina

Sep 2020–Mar 2022

- Fullstack Engineer utilizing the .NET stack for redesigning and implementing UI interfaces, developing backend features, and architecting the data layer to ensure efficient data management for a key product.
- Served as Scrum Master, managing team tasks using Jira, leading sprint planning, and successfully implementing Gitflow to standardize the development process and improve collaboration.

EDUCATION

UNIVERSIDAD TECNOLÓGICA NACIONAL

Software Engineering
